

# Vehicle Branding Price Guide

# Price guides made easy!

**Here at Print Box we know how important budgeting your vehicle graphics can be.**

So this is why we have produced an example cost of each type of vehicle graphic or vehicle wrap for each size of vehicle to make it easier for you to decide. The below drawings are a guide line of how much each type of vehicle advertising will cost. We have put together the chart below so that it gives you an idea of what you can expect to get from your budget.

The drawings are only a guideline and we can design your van, truck or trailer wrap to match your individual budget. Please feel free to send us over any designs you have for your vehicles and we will be able to give you a cost for these straight away. Alternatively if you would like us to do the design for your vehicle we can do so. All we will need from you by email is a few pictures of the vehicle, any details you would like going on the design (logo, company contact details etc) and any design ideas you have for the van, truck or trailer livery.

All prices below are excluding VAT. All of the vehicle wrap prices are based on the vehicle having none colour coded black plastic bumpers. (which cannot be wrapped due to not being painted). If your vehicles has colour coded bumpers and colour coded steps on the trucks there will be an extra charge to wrap the bumpers and steps.

Prices are subject to change, and are to be used as rough guides only. Prices are correct as of 1st April 2026. Final price will be quoted once artwork has been approved.
